## CALL FOR PAPERS FOR THEMATIC ISSUE

BOTANICAL BRAIN BOOST: UNVEILING NATURE'S SECRETS  
FOR NEURODEGENERATIVE DISORDERS

## SCOPE OF THE ISSUE

The thematic issue "Botanical Brain Boost: Unveiling Nature's Secrets for Neurodegenerative Disorders" aims to provide a comprehensive platform for exploring the role of medicinal plants and phytochemicals in the prevention, management, and treatment of neurodegenerative disorders. The scope encompasses traditional herbal knowledge and contemporary scientific investigations addressing disorders such as Alzheimer's disease, Parkinson's disease, multiple sclerosis, and related neurological conditions. It highlights neuroprotective, antioxidant, anti-inflammatory, anti-apoptotic, and cognition-enhancing properties of medicinal plants, along with their molecular mechanisms and pharmacological relevance. This issue welcomes contributions on well-established herbs such as *Centella asiatica*, *Ginkgo biloba*, *Glycyrrhiza glabra*, *Jasminum sambac*, *Curcuma longa*, *Panax ginseng*, *Tinospora cordifolia*, *Withania somnifera*, *Bacopa monnieri*, *Rosmarinus officinalis* and *Ocimum sanctum*. Emphasis is placed on experimental, preclinical, and clinical studies, formulation strategies, safety aspects, and translational potential of herbal interventions. By integrating traditional wisdom with modern neuroscience and pharmacology, the thematic issue aims to foster interdisciplinary research and promote evidence-based botanical approaches for improving cognitive health and advancing neurodegenerative disease therapeutics.

## GUEST EDITOR

**Dr. Smita Narwal**

Professor,  
Global Research Institute of  
Pharmacy, Radaur.  
Yamunanagar
